Allowable Subject Matter

1. Claims 38-49,74,77,79-80, 83, 85-86, 89, & 91 are allowed.

The following is an Examiner's statement of reasons for allowance:

The closest prior art is Vollmer (U.S. Patent No.: 6,064,689) and Dell-Imagine (U.S. Patent No.: 5,517,688) which are IDS documents of record. Vollmer teaches: a code division multiplex receiver in a mobile which receives a combined data signal over shared spectrum, samples the combined signal, estimates the channel response for the combined signal and determines the cross correlation matrix using the estimated channel response per col. 2 line 22-col. 3 line 38 and per col. 4 line 5 line 24 respectively. Dell-Imagine teaches: sampling the combined signal at multiple chip rates per col. 1 lines 22-25.

Claims 38-49, 74, 77, 79-80, 83, 85-86, 89, & 91 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including: "determining or means for determining a cross correlation matrix using the estimated channel response, determining or means for determining the spread data vector using order recursions by determining a first spread data estimate using an element from the cross correlation matrix and recursively determining further estimates using additional elements of the cross correlation matrix; and estimating or means for estimating data of the data signals using the spread data vector" as specified in claims 38, 42, & 46.

"estimating or means for estimating a channel response for the combined signal at the multiple of the chip rate; combining the multiple chip rate estimated channel response as an effective chip rate channel response; determining or means for determining a spread data vector using the Application/Control Number: 10/052,943

Art Unit: 2616

effective samples, the effective channel response and a Fourier transform, and estimating or means for estimating data of the data signals using the spread data vector" as specified in claims 74, 80, & 86

Page 3

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W. Wilson whose telephone number is 571/272-3075. The examiner can normally be reached on M-F (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on 571/272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
